Note: Every topic requires HLED9101.

I have rearranged to put all of the fundamental topics to be covered in the first year. Then subsequent advance topics will each have the baby topic undertaken.

The research topic sequence is critical.

HLED9108, literature review method can be taken with HLED9113A research proposal & ethic application but the later depends on the former.

HLED9113B must have research proposal and ethics approval before they can commence the research – which is this topics focus. Ethical approval must be formally obtained.

Ideally, HLED9108, HLED9113A and HLED9113B would all be taken sequentially, BUT this is not always possible.
